

SOUMALYA HAJRA

Manual QA Engineer | Automation Agent Testing | Agile Delivery

+91 7001923425 | [linkedin.com/in/soumalya-hajra](https://www.linkedin.com/in/soumalya-hajra) | github.com/SoumalyaA007 | Jaipur, India

PROFESSIONAL SUMMARY

Software Tester with hands-on experience testing web-based workflows, end-to-end user journeys, and integrations in a live Agile/Scrum environment. Skilled in functional, regression, exploratory, and UAT testing, with a proven record of raising defect detection quality and accelerating go-live readiness. Experienced in JIRA-driven defect management, REST API validation, and cross-browser compatibility testing. Quickly absorbs new domains and automation concepts — including browser-based workflows, RPA fundamentals, and CI/CD pipelines. Strong communicator comfortable interacting directly with stakeholders and guiding clients through test sessions.

PROFESSIONAL EXPERIENCE

Software Tester

Mar 2025 – Present

Ubuy Technologies Pvt. Ltd.

Jaipur, India

- Owned end-to-end quality for a high-traffic global e-commerce platform, executing 300+ test cases per sprint across functional, regression, smoke, and exploratory test types — achieving zero critical-defect escapes to production in 3 consecutive releases.
- Reduced average defect resolution time by providing JIRA reports with precise reproduction steps, severity/priority classification, and annotated screenshots, enabling developers to reproduce and fix bugs faster.
- Partnered with developers and business analysts during sprint planning to review acceptance criteria, identify requirement ambiguities early, and prevent defect injection at the source — cutting mid-sprint rework by an estimated 20%.
- Designed and maintained a structured test suite covering 8 critical user journeys (registration, login, product search, cart, checkout, order confirmation) with full traceability to business requirements.
- Led cross-browser and cross-device compatibility testing across 4 browsers and 3 device categories, identifying 15+ environment-specific defects ahead of production deployments.
- Supported UAT coordination with stakeholders, guiding clients through test sessions, documenting findings, and driving sign-off — directly mirroring the customer-facing QA responsibilities of this role.
- Participated in daily standups, sprint reviews, and retrospectives, consistently communicating QA status, risks, and blockers to the wider Agile team.

Software Tester (Intern)

Jan 2025 – Mar 2025

Ubuy Technologies Pvt. Ltd.

Jaipur, India

- Designed and executed manual test cases for 5+ new feature builds, applying boundary value analysis and equivalence partitioning to maximise coverage with minimal redundancy.
 - Performed exploratory testing on pre-release builds, surfacing 10+ edge-case defects before formal test cycles, saving sprint time and developer rework effort.
 - Logged all defects in JIRA with step-by-step reproduction details and screenshots, achieving a 100% reproduction rate for all reported issues during internship.
-

KEY PROJECTS

OpenCart E-Commerce Test Automation Framework | *Selenium WebDriver · TestNG · Page Object Model · Jenkins · GitHub*

- Built a scalable end-to-end automation framework covering 6 critical user journeys; POM design pattern reduced test maintenance effort by ~40% after UI changes.
- Implemented data-driven testing via TestNG DataProviders, enabling the same test logic to validate 50+ input combinations without script duplication.
- Integrated with Jenkins CI/CD pipeline for commit-triggered automated execution, reducing manual regression effort and providing consolidated pass/fail reports.

RESTful API Test Automation Framework | *RestAssured · TestNG · Postman · JSON Schema Validation · Git*

- Developed a structured API test suite validating HTTP status codes, response bodies, JSON schema, response times, and error messages across multiple service endpoints.
- Built a reusable request-builder library eliminating ~60% of duplicated API call code across test modules, improving maintainability and onboarding speed.
- Designed Postman collections for Dev, QA, and Staging environments with environment variables, eliminating manual configuration changes between test runs.

TECHNICAL SKILLS

Manual Testing: Functional, Regression, Smoke, Sanity, Exploratory, UAT, Integration, E2E, Black-Box, BVA, Equivalence Partitioning

Test Design & Management: Test Plan, Test Case Design, Test Strategy, Requirement Analysis, Traceability Matrix, Test Execution, Defect Lifecycle

Defect Management: JIRA, Bug Reporting, Root-Cause Analysis, Severity & Priority Classification, Re-testing, Regression

API Testing: REST API Testing, Postman, RestAssured, JSON Schema Validation, HTTP Methods (GET/POST/PUT/DELETE), Status Code & Payload Validation

Automation & CI/CD: Selenium WebDriver, TestNG, Page Object Model, Data-Driven Testing, Jenkins, Git, GitHub, Maven

Browser & Integration Testing: Cross-Browser Testing, Cross-Device Validation, System Integration Testing

Agile Tools: Agile/Scrum, Sprint Planning, Daily Standup

Programming: Java (OOP, Core), SQL (Basic Queries)

EDUCATION

B.Tech in Computer Science — University of Engineering and Management (UEM), Jaipur 2025
CGPA: 8.52 / 10

Class XII (WBCHSE) — Burdwan Municipal High School 2021
87.2%

Class X (ICSE) — St. Paul's Academy, Burdwan 2019
91.7%

CERTIFICATIONS

- Introduction to Software Testing — University of Minnesota (Coursera)
- Linguaskill English Certification — CEFR B2, Cambridge University Press & Assessment

LEADERSHIP & ACTIVITIES

- President, Gaming Club — UEM Jaipur: Led 50+ member club; organised inter-college tournaments and managed end-to-end club operations.
- Organising Committee — AceHack 1.0 Hackathon: Co-organised in-person event for 100+ participants, coordinating logistics, teams, and judging.
- Member, ACM Student Chapter & Photography Club — UEM Jaipur.
