

SOUMALYA HAJRA

Software Tester | Manual & Automation Testing | Selenium · RestAssured · CI/CD

☐ +91 7001923425 ☐ [linkedin.com/in/soumalya-hajra](https://www.linkedin.com/in/soumalya-hajra) ☐ github.com/SoumalYA007

PROFESSIONAL SUMMARY

Detail-oriented QA Engineer with hands-on experience at Ubuy Technologies, a global e-commerce platform, contributing to quality across the full software development lifecycle. Skilled in manual testing disciplines including functional, regression, smoke, exploratory, and UAT testing, with a strong foundation in test case design, defect management, and cross-browser validation. Additionally experienced in building Selenium + TestNG automation frameworks and RESTful API test suites integrated with Jenkins CI/CD pipelines. A fresh engineering graduate who bridges thorough manual testing instincts with growing automation capability.

PROFESSIONAL EXPERIENCE

Software Tester | Ubuy Technologies Pvt. Ltd.

Mar 2025 – Present • Jaipur, India

- Execute functional, regression, smoke, and exploratory test cases across the e-commerce platform to ensure application stability before each release.
- Collaborate with developers and product managers during sprint planning to review requirements, identify ambiguities, and contribute to testable acceptance criteria.
- Design and maintain detailed test cases and test plans in a structured test management repository, ensuring full traceability to business requirements.
- Perform cross-browser and cross-device compatibility testing to validate consistent user experience across supported environments.
- Log, triage, and track defects in JIRA with clear reproduction steps, severity classification, screenshots, and environment details, facilitating faster developer resolution.
- Conduct re-testing and regression testing post bug-fix to verify issue resolution and confirm no unintended side effects on related functionality.
- Participate in daily standups, sprint reviews, and retrospectives as part of an Agile Scrum team, maintaining transparent QA status communication.
- Validate UI/UX flows including user registration, login, product search, add-to-cart, checkout, and order confirmation against design specifications.
- Support UAT cycles by coordinating with stakeholders, documenting findings, and ensuring test sign-off before production deployments.

Software Tester Intern | Ubuy Technologies Pvt. Ltd.

Jan 2025 – Mar 2025 • Jaipur, India

- Assisted senior QA engineers in designing and executing manual test cases for web application features under active development.
- Learned and applied structured test case writing techniques, gaining hands-on exposure to the full defect lifecycle from discovery through closure.
- Performed exploratory testing on new feature builds to identify edge cases and usability issues ahead of formal test cycles.
- Documented test execution results and raised defect reports in JIRA with supporting screenshots and step-by-step reproduction details.

KEY PROJECTS

OpenCart E-Commerce Test Automation Framework

Selenium WebDriver · TestNG · Page Object Model · Jenkins · GitHub

- Designed and developed a scalable end-to-end test automation framework for an e-commerce web application, covering critical user journeys: registration, login, product search, add-to-cart, checkout, and order confirmation.
- Applied the Page Object Model (POM) design pattern to centralise all UI locators and page interactions, significantly reducing test maintenance effort after UI changes.

- Implemented data-driven testing using TestNG DataProviders, enabling test scenarios to execute across multiple input data sets without duplicating test logic.
- Integrated the automation framework with a Jenkins CI/CD pipeline, enabling automatic test execution triggered by code commits with consolidated pass/fail reporting.
- Maintained test scripts on GitHub with structured version control, supporting team collaboration and change traceability.

RESTful API Test Automation Framework

RestAssured · TestNG · Postman · JSON Schema Validation · Git

- Developed a structured API test automation framework using RestAssured and TestNG to validate REST API endpoints across multiple services.
- Created comprehensive test cases covering HTTP status code validation, response body verification, JSON schema validation, response time checks, and error message accuracy.
- Built a reusable request-builder library to standardise API call construction across all test modules, reducing duplication and improving framework maintainability.
- Designed Postman collections for Development, QA, and Staging environments with environment-specific variables, eliminating manual configuration changes between test runs.

TECHNICAL SKILLS

Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, UAT, Integration Testing, End-to-End Testing, Black-Box Testing, Boundary Value Analysis, Equivalence Partitioning

Test Design & Management: Test Plan Creation, Test Case Design, Test Scenario Writing, Test Strategy, Requirement Analysis, Traceability Matrix, Test Execution, Test Closure Report

Defect Management: Bug Reporting, Defect Life Cycle, Root-Cause Analysis, Severity & Priority Classification, Re-testing, Regression Testing

Test Automation: Selenium WebDriver, TestNG, Page Object Model (POM), Data-Driven Testing, RestAssured, Test Automation Framework Design, Cross-browser Testing

API Testing: Postman, REST API Testing, JSON Schema Validation, HTTP Methods (GET/POST/PUT/DELETE), Status Code Validation, Response Body Verification, Payload Testing

CI/CD & Version Control: Jenkins, Git, GitHub, Branching Strategy, Continuous Integration

Bug & Project Tools: JIRA, Confluence, Agile/Scrum, Sprint Planning, Daily Standup

Programming: Java (core, OOP), SQL (basic queries), HTML/CSS (basic — for DOM inspection)

IDE & Build Tools: IntelliJ IDEA, Maven, MS Excel (test reporting)

Soft Skills: Attention to Detail, Analytical Thinking, Clear Communication, Documentation, Team Collaboration

EDUCATION

B.Tech – University of Engineering and Management (UEM), Jaipur **8.52/10 | 2025**

Class XII (WBCHSE) – Burdwan Municipal High School **87.2% | 2021**

Class X (ICSE) – St. Paul's Academy, Burdwan **91.7% | 2019**

CERTIFICATIONS

- **Introduction to Software Testing** — University of Minnesota (Coursera)
- **Linguaskill English Certification (CEFR B2)** — Cambridge University Press & Assessment

LEADERSHIP & ACTIVITIES

- President, Gaming Club — UEM Jaipur: Led a 50+ member club, organising inter-college tournaments and managing club operations.
- Organising Committee Member — AceHack 1.0: Co-organised an in-person hackathon at UEM Jaipur, coordinating logistics, teams, and judging for 100+ participants.
- Member, ACM Student Chapter — UEM Jaipur: Participated in technical workshops and coding events representing the chapter.
- Member, Photography Club — UEM Jaipur: Developed strong visual documentation and attention to detail.
